The "Alligator" Wrenches are forged solid in one piece, with tempered steel jaws. They have ratchet teeth cut diagonally across one jaw, thus enabling them to bite with three teeth at once.

The "Curtis" Wrenches have the diagonally cut teeth of the "Alligator" on both jaws acting in opposite directions. The jaws are connected by swinging bolt and swinging link which gives a quick, sure grip. These Wrenches can be used in contracted space where no other wrench can.
